

ABOUT NEW SOUTH WALES

New South Wales is the site of Australia's first permanent European settlement which is now Sydney. The city is built on the magnificent Sydney Harbour, one of the most spectacular and identifiable harbours in the world, Sydney is now a bustling metropolis.

New South Wales is a large state with a climate ranging from sub tropical to alpine to semi desert. The Great Dividing Range to the east divides the many popular beaches, national parks and resorts of the east coast, from rich farming lands of the western slopes and the dry western plains that occupy two-thirds of the state. The mighty rivers: the Murray, Darling and Murrumbidgee, bring life and riches to the dry continent as they meander across the vast inland plains of NSW.

ABOUT NORTHERN TERRITORY

Massive cattle stations for beef production have been the traditional backbone of the Northern Territory, however opportunities for work in horticulture have grown in recent times with production areas around Darwin, the Territory capital and Katherine in particular. Tropical crops are grown on fertile soils with water being sourced underground on many farms. The close proximity to the vast markets of South East Asia will see the region's production and the requirement for labour to grow.

Situated on the edge of a harbour bigger than Sydney's, Darwin is a beautiful, fascinating tropical city – a melting pot of people and cultures that prides itself in its unique and friendly laid-back lifestyle.

The tropical conditions around the "Top End" can be difficult to get used to with extremely trying conditions in high humidity time, known as "the wet". Adequate rest needs to be taken for the day ahead.

Queensland

ABOUT QUEENSLAND

A vast range of crops are grown in Queensland, from cooler climate speciality crops in the southern ranges to the tropical crops of the north and the broad acre crops grown on the massive western plains of the State's inland. The coastal strip from south to north provides an abundance of horticultural work opportunities with much of the produce picked, packed and shipped fresh to markets in Australia and overseas. Grain and cattle production is centred mostly in the outback regions where conditions are often harsh, but the experiences are worthwhile. The capital, Brisbane is in the far south, located on the banks of the Brisbane River. The resort and holiday regions of the Gold Coast and the Sunshine Coast are to the south and north of the city. The Great Barrier Reef, one of the great wonders of the world is located off the Queensland coast and attracts thousands of visitors each year, as do the many islands adjoining the coastal areas which offer spectacular fun in the sun.

ABOUT SOUTH AUSTRALIA

Irrigation farming and dryland cropping, particularly in the east of the State and dryland stock production in the State's north are the production features of South Australia. The Murray River provides wealth through irrigation of citrus, grapes and stonefruit in the east as it enters the State and sweeps southwards to the sea. Australia's premier wine regions of the Barossa and Clare Valleys are mid state to the north of Adelaide with the Southern Vales area south of the city and close to the coast. Market gardens are located on the northern plains with the State's grain production based to the north and west. Adelaide, the State capital, is situated on the Torrens River and nestles between the Mount Lofty Ranges and Holdfast Bay.

ABOUT TASMANIA

Horticulture is a vibrant and flourishing industry in Tasmania and involves the production of cherries, hops, vegetables, grapes, apples, berries, walnuts and stonefruit. The fertile Valleys of the Coal River, Huon Valley and Derwent Valley in the south; Meander Valley, Tamar Valley and Dorset Region in the north; and Mersey Valley, Leven Valley and Circular Head district in the north west are responsible for much of the State's developed horticulture. Cultural changes have seen the production of wine and other fruit crops as well as herbs in recent times.

The Tasmanian wine industry is well regarded for the subtlety of its many cool climate varieties. Forestry has been significant historically and the husbandry of high quality sheep and cattle is also important to the economy of the State. Hobart, the State capital, is located in the south and is situated on the banks of the Derwent River, where every year comes to a close with the finish of the world famous Sydney to Hobart yacht race at Constitution Dock, in the heart of the city. For information about Tasmania visit www.discovertasmania.com.

ABOUT VICTORIA

Victoria's fertile soils and access to water for irrigation confirms the State as a great food source for the nation. The Murray River, which forms the northern border with NSW, provides water for the production of a range of fruit, vegetables and stock. The rangelands and slopes allow cool climate cropping with the vast plains of the west providing most of Victoria's wool and grain production. Melbourne, the second largest city in Australia, on the banks of the Yarra, is regarded as the sporting and cultural capital of the nation. For information about backpacking in Melbourne and Victoria, visit www.backpackvictoria.com.

It is illegal to carry some fruits and vegetables into the fruit fly free zones which can be found by visiting www.pestfreearea.com.au and www.fruitfly.net.au. If travelling into the Western and Eastern regional areas be aware of the Greater Sunraysia Pest Free Area and the Fruit Fly Exclusion Zone. On-the-spot-fines of up to \$550 can be issued.

ABOUT WESTERN AUSTRALIA

Australia's largest State has intensive development in the south west corner with a range of crops being produced, including a premium wine area on the south western coast. A large development following the establishment of Lake Argyle on the Ord River, has centred in the Kimberley region of the north of the State, with other production areas for horticulture in the Gascoyne region. There is grain production in the rangelands to the east and south of the State capital, Perth.

Perth is located on the banks of the Swan River, which has provided opportunities for grapes and vegetable production close to the city. Perth has grown as a result of successful mining carried out throughout the State. Grain harvesting opportunities are available in the Great Southern and Southern Wheatbelt regions south east of Perth.

GRAIN HARVEST

The grain harvest is extremely important to the Australian economy and is a year-round industry with crops such as wheat, barley, oats, chickpea and canola grown in the winter months and sorghum, maize sunflower, soy and mungbeans grown throughout the summer months. Harvest production can overlap in the regions and itinerant labour is highly sought after.

The number of vacancies and length of employment varies according to the size of the harvest and harvesting programmes of growers. As with any harvest, the size and production depends on the weather; not enough rain throughout the growing season can mean no or very little crop production and too much rain at harvest time can get in the way. The harvest is continually monitored by farmers and lasts for approximately six to eight weeks in each of the harvest regions.

Harvest workers can be a mixture of travellers, backpackers, retirees, school and university leavers and farmers.
